

Professional test kit

The professional test kit is used to measure:

- The dissolved total salts with the **electronic STD-Test**
- pH (with the **electronic pH-METRE** and 2 buffer solutions 7 and 4)
- Hardness (TH)
- Alkalinity (TAC)

**Then to measure water balance by using the LANGELIER formula
Or have an approximation by using the TAYLOR balance**

The professional test kit is also used to measure:

- Hydrogen peroxide
- Poly Hexa-Methylene Biguanide (P.H.M.B)
- Chlorine
- Stabiliser level (cyanuric acid)
